

Access Lite

This vehicle lift from PLS is a cassette based semi/fully automatic telescopic platform. It delivers the lightest and most flexible solution on the market, engineered specifically for vans, mini and midi-buses.

It delivers the widest range of options available today and its flexible design ensures compatibility with all community transport, local authority and rental company vehicles and delivery vans. Whether the standard version, or with upgraded safety features, installation and service is straightforward and efficient.

This lift is stowed externally under the vehicle floor in a compact and unobtrusive box that protects the platform, barriers and mechanisms from corrosion. When operated via a simple two button controller, the lift platform will automatically deploy from its cassette. Automatic inner and outer barriers, mechanically and hydraulically controlled, provide maximum safety when lifting and lowering wheelchairs, passengers and cargo.

A choice of 1410mm, 1510mm and 1610mm lengths with associated widths of 825mm or 925mm as standard. Bespoke versions can be produced and able to achieve sector leading lifting height and capacity. Generous surface dimensions allow ample space for the operator to stand on the platform whilst lifting.

Benefits

- Strong, durable and safe
- Reduced fuel consumption due to product weight
- Flexible design with advanced mini-bus compatibility
- High quality, reliable components that are proven to perform
- Minimised downtime with straightforward servicing
- No loss of internal vehicle space
- Antivibration and noise reduction features as standard
- Self-levelling inner barriers and anti-slip surfaces as standard
- PLS installation available on request

Options

Doorsafe
StopSafe Barrier
Flashing LEDs
Bumper Step
Upgraded 500Kg SWL
2-Tone warning buzzer
Double throw in/out handrail
extensions
Cycle counter
Wireless control

Technical

Weight from 150Kg
Available in 12v or 24v
2 button control
Automatic inner and outer
barriers
Hydraulic outer barrier
Twin handrails
Emergency manual hand pump
Manual override on all systems
Interior or exterior powerpack

Safety compliance

SWL and CE Certificates
LOLER Installation Compliance
Fully PSVAR, DDA, COIF, BS6109, EEC2001/85 and IVA2009
Meets ECWVTA (European Whole Vehicle Type Approval)
ISO accredited production
