

PLS is the number one choice for those looking to make their minibuses accessible to all. We deliver the widest range of underfloor and inboard access lift options to suit all your specific accessibility requirements.

Our products are designed to deliver the highest level of safety and reliability. They are pre-configured with several features to meet worldwide standards including IVA (Individual Vehicle Approval) and ECVTA (European Whole Vehicle Type Approval) for a simple and fully compliant installation.

The Access ECO cassette lift is the latest version of our flagship accessible minibus product, which has been in production for over 30 years. During this time, the product has been reimagined and evolved to be the innovative product you see today. Our latest engineering changes include incorporating a strong lifting capacity of up to 500Kg while maintaining a low overall product weight.

Vehicle lifts for minibuses do not have to be under the floor. The PLS Easy Access is fitted to the rear or side entrance of the vehicle, inside the minibus, keeping it safe from the elements. This makes it easier to keep clean and with just one button to bring the lift out ready for use, it is simple to operate.

By adding a powered step to the side or rear of your minibus doorway you can provide passengers with a strong and safe way to enter the vehicle when the original step isn't low enough.

Our non-slip aluminium step can be retrofitted easily to a new or older vehicle and can take a load of 250Kg making it extremely strong and durable.

Accessible Minibus

Access Lite

- Platform widths up to 925mm
- Platform lengths up to 1780mm
- Safe working load up to 500Kg
- Low unit weight to lifting capacity ratio
- 12 volt or 24 volt options
- Automatic inner and outer safety barriers
- Manual backup system
- Compatible with StopSafe and DoorSafe

Easy Access

- Platform widths up to 915mm
- Platform lengths up to 2000mm
- Safe working load up to 500Kg
- Unit weight from 165Kg
- 12 volt or 24 volt options
- Stainless steel bearings
- Manual backup system
- Compatible with DoorSafe, cycle counters and wireless controllers

Versa Steps

- Step depths up to 310mm
- Step widths up to 1200mm
- Step thickness from 46mm
- Manual or powered operation
- Loading capacity up to 250Kg
- Step weight from 16Kg
- 250,000 Cycle tested
- Meets R107 and 98/37EC directives

Enhanced Safety

- Additional DoorSafe and StopSafe barriers available
- Optional LED warning lighting and two-tone audible alarms
- Vehicle dedicated mounting kits
